THANKS AI Original App

Introduction of Functions and Download Method

An original App packed with functions that allow you to experience and expand Thanks Al activities.

Start by downloading iOS version or Android version!

Notes on Download (Push Notification)

On iOS devices, when installing the app, a pop-up (guidance) will appear asking if you want to allow notifications sent from the app. Please be sure to select "Allow". If this setting is not allowed, you will not receive notifications even if push notifications are turned ON in the app settings.

On Android devices, "Allow notifications" is the default setting. (After installation, you can set notifications in "Settings" on each mobile device)

Notes on Download (Login)

* The login user ID and password are the same as those set on member's Back Office.

* When inputting the login user ID, please be noted that the member ID always ends with "000".

Example: If member ID: 1234567000 is abbreviated and entered as 1234567, you cannot log in. You can check your member ID on Back Office's registration information.

* Same as member's Back Office, password is required to reset for the first time of login after registration.

iOS - Installation Method

Tap **[App Store]** on iPhone home screen

Search for [Thanks AI]

Tap "Get" to start downloading
