Proteoglycan

High purity proteoglycan of Biomatec Japan, Inc. is generated by alkali extraction got international patent and it gives moisturizing capacity more than hyaluronic acid and collagen to skin.

Wow!
!?

1g=33million yen!? **Miracle component**

Proteoglycan to have several excellent action, however, it is to was very expensive and **33 million yen** a 1g, and there was no mass production of technology. Therefore, there was no general to be distributed.

So **Mr. Yoshiaki Kudo** who is CEO of Biomatec Japan, Inc. of Our group company challenged the mass production of proteoglycans.

Mr. Kudo had conducting research of proteoglycan for long time. And he founded the Biomatec Japan, Inc. in Kushiro, Hokkaido in May 2006. Finally, he has discovered **the alkali extraction method** to overturn the common sense of acetic acid extraction method, which has been performed in previous studies. And commercialization of proteoglycans went at once.

Biomatec Japan, Inc.
CEO **Mr. Yoshiaki Kudo**

International Patent
Alkali extraction got
international patent

Leave
Protein
Technology

It overturns common sense of past !/

90%* high purity proteoglycan has extracted

by the world's only **LPT** (Leave proteintechnology)

(※Limit is 20% so far)

Patent number

| | U.S.A | 8153769 |
| | Russia | 2401849 |

Patent pending
China, India, EU...

World attention! A number of Awards!!

**Wining of Prime Minister's
Award in Japan**

First Award

- Biotechnology companies
- Founded less than 10 years companies
- In Hokkaido

Topic in the **media** and **event!!**

- IMF World Bank annual meeting
- National Museum of Nature and Science
- Natural products expo
- NHK 「YuudokiNetwork」 TV program
- and more...

The delivery starts
123 in the world
countries.
